Full-stack Developer

RELEVANT EXPERIENCE

Masterpeace, [TIY](#) Final Project — *Full-Stack Developer*

APRIL 2017 - PRESENT

Working with a team of fellow students/developers to create a full-scale web application that integrates an art gallery with social media. Users can only post content and leave positive feedback in the form of like buttons, breaking the norm in social media.

Using Agile methodologies to coordinate the work amongst the team and myself, we met the criteria of the assignments and then further advanced our knowledge of the subject by trying for new features, using foreign programming languages and packages.

WORK EXPERIENCE

Page Road Grill, Durham, NC — *Front of House Staff*

OCTOBER 2015 - PRESENT

Focused within the team how to organize daily duties to offer exceptional service to customers. Within the team I helped daily preparation to offer quick delivery of goods to kitchen and vice versa. Delivered fast but exceptional service to customers to allow for quick conversion in a hectic fast-paced work environment.

EDUCATION

[The Iron Yard](#), Durham, NC — *Back-End Engineering*

FEBRUARY 2017 - MAY 2017

Accelerated, fast-paced immersive course encompassing back-end programming. Developed back-end and front-end components of several different projects, not limited to: an implementation of Trello.com, a StackOverflow clone and various command line and web based applications.

Leesville Road High School, Raleigh, NC

SEPTEMBER 2012 - DECEMBER 2014
