Full-Stack Developer

RELEVANT EXPERIENCE

AT&T (Apex Systems, LLC), Durham, NC — Full-Stack Developer

MAY 2017 - PRESENT

Working with a large team of developers, I have developed various components for multiple projects and applications on an enterprise level. Managing time in sprints, we have completed two full projects for third-party companies that have already generated impressive profits for both third-party companies and AT&T alike.

Masterpeace, TIY Final Project — Junior Developer

APRIL 2017 - PRESENT

A full-scale web application that integrates an art gallery with social media. Users can only post content and leave positive feedback in the form of like buttons, breaking the norm in social networking.

OTHER WORK EXPERIENCE

Trilogy Education Services, Full-Stack Web Development Course, Raleigh, NC — Teacher's Assistant

AUGUST 2017 - PRESENT

Provide excellent guidance to prospective developers learning the ways of the trade to later employ that knowledge in the real world. So far, I have helped with project grading, developing and enhancing the curriculum and various administrative tasks.

Page Road Grill, Durham, NC — Front of House Staff

OCTOBER 2015 - MAY 2017

Focused within the team best practices to organize daily duties to offer exceptional service to customers. Assisted in daily preparations and shift-planning to offer quick delivery of goods to kitchen and vice versa. Delivered fast yet exceptional service to customers to allow for quick conversion in a hectic, fast-paced work environment.

EDUCATION

The Iron Yard, Durham, NC — *Back-End Engineering*

FEBRUARY 2017 - MAY 2017

Accelerated, immersive and fast-paced course encompassing back-end programming. Developed back-end and front-end components of several different projects, not limited to: an implementation of Trello.com, a StackOverflow clone and various command line and web based applications.

Wake Technical Community College, Raleigh, NC — *Network Systems Administration*

OCTOBER 2015 - PRESENT

Began the path towards a degree and completed 4 credit hours. Currently working on becoming financially stable and independent before returning to this path. Paired with this degree, I am pursuing a CCNA and Linux Security Specialist certification.
